Wayne, Pa.

**PHILADELPHIA**  
1923

362.1  
J 357  
V. 46  
1923

THE JEFFERSON HOSPITAL receives the injured and sick irrespective of race, nationality or religion.

Patients desiring admission should apply at the Hospital between 8 A. M. and 5 P. M., or to any member of the Medical Staff.

Cases of recent accident occurring in Pennsylvania are admitted at any hour of the day or night.

The insane, and patients suffering from contagious diseases or alcoholism are not received, except when temporary relief is possible; incurable cases are not admitted.

The Maternity Hospital is located at 224-226 West Washington Square, with a dispensary at 2545 Wharton Street. Women are received and cared for during confinement, or attended at their homes.

The Department for Diseases of the Chest is located at 236 and 238 Pine Street. A ward service of 40 beds is maintained, and an Out-Patient Department, with follow up work, is conducted. Patients with advanced pulmonary tuberculosis only are admitted to the wards.

Ivycroft Farm, the Convalescent Home for Men, is located near Wayne, Pa. Admissions are made through the Social Service Department of the Hospital.

## A SUMMARY

Patients admitted, 8,885

Patients treated, 9,268

Surgical operations, 5,347

The Maternity has administered to 2,968 women;  
1,091 babies

The Department for Diseases of the Chest has admitted 163  
patients to wards and 6,734 visits were made to the Out-Patient  
Department

Out-Patients 35,470, re-visits 120,851

Prescriptions filled in Out-Patient Drug Store, 40,730

✧ In all public departments, 61,492 patients

Average patients per day in all departments, 834

## THE PURPOSES FOR WHICH ENDOWMENTS AND CONTRIBUTIONS ARE REQUESTED.

Radium Department.

Department for the Study of Diseases of the Heart.

Dental Department.

Training School for Nurses.

## THE JEFFERSON HOSPITAL

The past year, ending May 31, 1923, completed the forty-sixth year of the Hospital. The properties, 1012-1014-1016 and 1018 Spruce Street were altered and modernized for a Nurses' Home, to which the one hundred and sixty pupil nurses and their supervisors moved during the summer of 1922. On July 19, 1922, immediately after the nurses vacated the old Nurses' Home, demolition was begun of the old Hospital, a five story building, used for hospital purposes from 1877 to 1907.

### DESCRIPTION AND PURPOSES OF THE ANNEX OF THE JEFFERSON HOSPITAL

In the Hospital Annex now under construction, it is proposed to provide the following:

The Clinical Amphitheatre will occupy a portion of each of the first and second floors and basement. It will have a seating capacity of, at least, five hundred.

The basement, on a level with the floor of the Clinical Amphitheatre, will have Anesthetizing and Sterilizing Rooms, The Lucy B. Henderson Radium Department, Neurological, Orthopedic, Clinical Medicine and Gastro-Enterological Out-Patient Departments will also be located on this floor.

The First Floor will contain a Staff Room, the Social Service Department, and Rooms for Occupational Therapy.

On the Second Floor will be located an addition to the Louis Clark Vanuxem X-Ray Department, the Dental Clinic, and the Chevalier Jackson Bronchoscopic Clinic.

The Third, Fourth, Fifth and Sixth Floors will remain temporarily unfinished. When we have secured, through the Centennial Campaign in January, 1924, the \$1,500,000 so urgently needed, these four floors can then be scientifically equipped for such College and Teaching-Hospital purposes

as, in the judgment of the Trustees and Faculty will best increase the medical prestige of this City, State and Nation.

The Eighth, Ninth, Tenth, Eleventh, Twelfth and Star Floors will be constructed for private rooms, so much needed in a first-class general hospital. The income from the private rooms, and from other sources, provides for the free treatment of the sick and injured. The new private-room floors, when finished, will make it possible to have additional Ward Space on the private-room floors of the present General Hospital.

Three Surgical Operating Rooms and Two Maternity Delivery Rooms will be located on the Fourteenth Floor. Dressing Rooms for Surgeons, Anesthetizing Rooms, Nurses' Work-Rooms and Sterilizing Rooms will adjoin the Operating Rooms on this floor.

An open and enclosed Roof Garden, which can be used both in inclement and in fair weather, will be located on the top of this building.

The last thought in Hospital Laboratories, will surmount the enclosed portion of the Roof Garden, where, with an abundance of light and ventilation, the Laboratories will be in possession of the increased space and facilities now so urgently needed for research work.

#### SUMMARY OF THE WORK OF THE HOSPITAL

The Hospital, receiving an appropriation from the Commonwealth of Pennsylvania, is subject to the Rules and Regulations of the Department of Public Welfare of the Commonwealth. There have been established a perpetual inventory in the store-room, a cost-accounting system and an entire new form of bookkeeping, so as to conform to other hospitals receiving State Aid.

The Credit Department, required by the Department of Public Welfare, was already in existence in this Institution, having been established in 1915.

## WARDS AND PRIVATE ROOMS

The wards, out-patient departments, emergency ward and private rooms record the greatest amount of service the Institution has ever been called upon to render.

During the past year 9268 patients were treated in the 500 beds of the Hospital. These patients received 142,397 days treatment, a day's treatment being the term used to express a unit of service rendered and means a twenty-four hour day of hospital service. These figures show an increase of 3 per cent. in the number of patients and an increase of 2.2 per cent. in the patient days as compared with last year.

## OUT-PATIENT DEPARTMENT

The Out-Patient Department, each year becoming more important and incidentally of increasing value to the community, treated 22,992 patients, as compared with 20,000 the previous year, an increase of 14.9 per cent. in the number of patients in comparison with the previous year.

These 22,992 patients made a total of 120,851 visits to the various out-patient departments.

## EMERGENCY SERVICE

The Emergency Service, which includes the receiving ward, ready day and night to receive accidents and render emergency treatment in the case of illness, treated 19,582 patients, as compared with 15,109 patients during the previous year, an increase of 29.5 per cent.

The two Cadillac ambulances answered 1044 calls during the year.

## TOTAL NUMBER OF PATIENTS

The number of new patients treated in all departments of the Hospital during the past year was 63,937. The average number of patients per day in all departments during the year was 834.

## FINANCIAL

The total cost of operation of the Hospital for the year ending May 31, 1923, was \$541,377.83 as compared with \$548,440.08 in the previous year.

The receipts from all sources for the year were \$525,583.00 as compared with \$555,729.46 in the previous year.

The accumulated deficit for the operation of the Hospital increased from \$26,314.09, May 31, 1922 to \$39,097.88, May 31, 1923.

The cost per diem for the maintenance of a ward patient in the past year was \$2.95, as compared with \$2.73 in the previous year.

### COST OF FREE TREATMENT

For the year ending May 31, 1923, 4980 patients received 87,866 ward patient days treatment at a cost per diem of \$2.95, amounting to \$259,204.70.

In addition to the cost of free service rendered to bed patients, \$259,204.70, the cost of free service furnished in the out-patient departments was \$53,174.44 and the cost in the emergency department amounted to \$9,054.75, a total of \$321,424.89.

The Commonwealth of Pennsylvania appropriated \$90,000 toward the \$321,424.89, the total cost of free treatment rendered by the Jefferson Hospital. The State of Pennsylvania contributed 28 cents out of every dollar spent by the Jefferson Hospital for the free treatment of the sick and injured.

For a more detailed report of the Statistical and Financial Report of the Hospital, see pages 64 to 70.

OPERATING ROOM IN THE ACCIDENT WARD

One accident case treated, on the average of every thirty minutes day and night, for the past ten years.

## Work of the Past Decade

## **PROVISIONS FOR THE PROFESSIONAL CARE OF PATIENTS**

The Jefferson Hospital has a capacity of five hundred beds, for the treatment of patients, and in addition conducts twenty out-patient departments for the treatment of ambulatory patients.

These various departments are under the professional care of the Hospital Staff, consisting of more than two hundred physicians.

The Nursing Staff is made up of seventeen supervising nurses; one hundred and sixty pupil nurses and fifty graduate nurses.

The Accident Ward is open day and night for the treatment of emergencies.

The Hospital maintains general laboratories wherein the various Pathologic, Bacteriologic, Serologic, Chemic, Metabolic examinations and tests are performed; an X-Ray and Fluoroscopic Laboratory; special Departments for the study and care of Diseases of the Heart; for the study and care of Gastro-Intestinal Diseases; a Dental Department; a Department for the study and treatment of Bronchial Asthma and Tuberculosis of the Lungs; a Department of Radium Therapy; Mechano-therapy; Electro-therapy and Occupational Therapy.

The Social Service Department, with a personnel of nine workers, deals with the social needs of the patients and their families.

Two complete pharmacies are in operation in the General Hospital and one at the Department for Diseases of the Chest.

The Ambulance Service is maintained by two fully equipped ambulances, ready for service at any time of the day or night.

The food for the patients is prepared in especially equipped kitchens, under the supervision of a chief dietitian, with four assistant dietitians.

## GIFTS RECEIVED DURING THE YEAR

In accordance with the Will of William E. Thompson, deceased, the Executors of this Estate paid the bequest of \$200,000.00 to be used toward the construction of an Annex to be known as the Samuel Gustine Thompson Annex of the Jefferson Hospital. Samuel Gustine Thompson was a former Trustee of the Jefferson Medical College and Hospital, who dying before his brother, William E. Thompson, had previously arranged for the creation of this Trust.

By the Will of Emma C. Nice, deceased, a bequest of \$5,000.00 was received by the Hospital to endow the—"The Dr. Curtis J. Nice Memorial Free Bed."

The Jefferson Hospital was one of the beneficiaries of the Philadelphia Annual Charity Ball and received \$2,200.00, towards constructing the Roof Ward for convalescent patients.

Mrs. Lucy B. Henderson, who founded the Radium Department and who has so generously supported this beneficent work, contributed the sum of \$5,000.00 to be used in providing suitable rooms in the New Building for the "Lucy B. Henderson Radium Foundation."

In accordance with the provisions of the Will of Samuel I. Hendrickson, deceased, the Hospital received a bequest of \$10,000.00 to endow two free beds in the Children's Ward in memory of his wife, Jean Cairns Hendrickson.

The Jefferson Hospital gratefully acknowledges the sum of \$14,082.45, to meet its deficit, from the Welfare Federation of Philadelphia.

For the acknowledgement of other contributions and donations, see pages 45; 78 to 82.

## HISTORICAL SKETCH

*Abstract from a sketch prepared by Dr. W. M. L. Coplin, Emeritus Professor of Pathology of the Jefferson Medical College and formerly Medical Director of the Jefferson Hospital, reprinted from Founders' Week Memorial Volume, "The JEFFERSON MEDICAL COLLEGE OF PHILADELPHIA" by the late Dr. James W. Holland, formerly Dean of the Jefferson Medical College.*

Medical education has always required that the didactic instruction be abundantly supplemented with clinical facilities. In May, 1825, several months in advance of the opening of the first session of lectures, an Infirmary had been organized within the walls of the building in which was to be inaugurated the Infant Medical College. On May 9, 1825, Dr. George McClellan performed the first operation in the amphitheater and in the Infirmary administered to the first patient. From this modest beginning, involving a single room, a small lecture amphitheater and an outlay of but a few dollars, was laid the foundation of the movement which nearly two-thirds of a century later culminated in the erection and equipment of an institution at that time the best of its kind on the continent.

In 1841 the re-organization of the school provided for systematic college clinics in both medicine and surgery. In 1843 rooms adjoining the College building were rented and fitted up for the reception of patients. A gradual increase in bed accommodation evolved this miniature hospital into one having crowded accommodation for twenty patients. The growing work of the College and the more general recognition of the vastly superior advantages of clinical teaching, led the Faculty and the Alumni to dream of better and more adequate facilities, and eventually from the ill-defined dream evolved the hope which later was to mature into a new hospital. Through 1870 and 1871 many plans for financing the proposition were discussed, but aside from arousing enthusiasm and awaking practical interest in the project, nothing of importance was accomplished. In December,

1872, the Alumni Association met in the old College building on Tenth Street and formally decided to act. On the condition that a feasible plan for further financing projects would be matured, the sum of fifteen thousand dollars was on this occasion pledged. Committees of the Alumni, Faculty and Board of Trustees were formed for the purpose of soliciting subscriptions, approaching the Legislature of the Commonwealth for a grant, and in other ways raising the necessary funds. The Board of Trustees appointed a Building Committee, consisting of Messrs. Phillips, Lippincott and Gardette, and later a Finance Committee, composed of Henry M. Phillips, Asa Packer and James Campbell. Later these committees were merged and joined with a committee of two from the Faculty and a like number from the Alumni Association.

On November 4, 1875, the contract was placed, and on April 27, 1877, the new Hospital was completed and officially opened, receiving its first patient on May 1st. The new institution, with its entire equipment, cost \$185,919.83; it afforded four large wards, a number of smaller wards adapted to isolation and segregation of selected cases, and ten private rooms. The maximum capacity for in-patients was 125, and the out-patient service was correspondingly small. Of the former, 441 were admitted during the first year, 621 in the second and 890 in the third. A corresponding increase was shown in the out-patient department, in which during the first year 4,659 patients were treated and in the third year, 5,497.

For thirty years this institution continued to grow in influence and in the amount of work accomplished. During the last year of its existence as a Hospital 2,392 patients were treated in the wards, 3,840 emergencies met, and 101,229 visits paid by out-patients. In the thirty years of activity 2,000,000 beneficiaries passed through its doors, 50,000 accident cases were treated, 5,000 doctors were equipped in its halls, and nearly 150 nurses graduated from its Training School.

The amphitheater of the Jefferson Hospital became renowned for the extent and quality of the clinical teaching that it afforded. It was the arena in which operated such surgeons of imperishable fame as the Grosses and the elder Pancoast. There the illustrious J. M. DaCosta taught and the erudite Bartholow lectured. "There, spoke Levis, Parvin, Wallace, Biddle, Brinton, Maury and others. There, as guests have stood Esmarch, of Kiel; Mikulicz, of Breslau; Faure, of Paris; Lorenz, of Vienna; Bryant, Durham, Horsley, Ballance and MacCormack, of London; Macewen, of Glasgow; Lawson Tait, of Birmingham; Annandale and Cheyne, of Edinburgh; Emmett, Weir and Thomas, of New York; Senn, of Chicago; our own Marion Sims, and a host of others."

Gradually the institution became totally inadequate for the demands thrown upon it. The higher standard of preliminary education required for the admission of students, the lengthening of the course of instruction, the improvement and extension of methods of teaching and other factors gradually led to the entrance into medical study of men possessing more advanced qualifications, and justly demanding proportionately increased facilities. In this improvement of conditions of medical education the Jefferson Medical College has ever taken a foremost rank, and now felt no inclination to recede. The Hospital originally was started as an adjuvant to teaching methods largely evolved within its hall, and, while accomplishing, as no institution could have better done the purposes for which it was created, had concurrently extended its influences along other humanitarian lines becoming a magnificent charity. Brought forth as a teaching institution, it grew to be one of the greatest charities among the many for which Philadelphia is deservedly noted. The wards became inadequate for the ever-increasing demands upon them; the out-patient departments no longer afforded anything like proper facilities for the care of those applying for treatment. A new hospital was needed.

While both Faculty and Alumni recognized the inadequacy of the old institution and desired something better, it is particularly to the Board of Trustees whose indefatigable energy has marked the rejuvenation of the new College that all are indebted for the completion of the new Hospital. Fully fifteen years before a stroke of work had been expended upon the new institution the Board began feeling its way toward the consummation of an idea which was then little more than a dream. Properties east of the old Hospital and lying between that structure and the old College were purchased; a new College building, at the corner of Tenth and Walnut Streets, was planned, constructed and occupied. In this way became available a plot of ground extending from the old Hospital to Tenth Street. For financing the proposition one million and a half dollars was necessary. The location, in the midst of the most closely built-up portion of the City, demanded that it should be absolutely fireproof; the enormous value of the ground prohibited the acquisition of a large building plot and consequently the structure must be many storied. No two elements add more to the expense of construction than fireproofing and height. The institution must be ideal from sanitary aspects and in every detail adapted to its contemplated purposes,—a great charity, a tremendous teaching plant, safe from fire and completely equipped. To attain these ends many paths had to be blazed, requiring time and money, so that from the date upon which the architect first put pen to paper to the dedication of the new building over five years elapsed. It was worth waiting for.

The old Hospital, when crowded, accommodated 125 patients; the new has ample facilities for over 300. The old was dark, gloomy, inflammable—as were all institutions of its time—the new capacious, fire-proof, sunny and well ventilated. Open streets on three sides with electricity for light and power, assures a cool, quiet building in summer and steam heat affords a comfortable winter temperature.

Built of steel, brick, terra-cotta, concrete and tile, the structure is fireproof. Capacious roof gardens afford facilities for open air treatment preferable to lawns. Every ward possesses an out-door balcony. The building contains eight operating rooms, each fully equipped for its specific uses. Of the fourteen wards, seven afford accommodations for twenty-four patients each, two for fourteen patients, and the smaller for from one or two to eight patients. Numerous single rooms on the public floors are used for isolation or seclusion of those dangerously ill or for other purposes requiring segregation.

During the last year in the old Hospital 2,267 patients were admitted to the wards. In the present year (1909) in the new institution the number will reach 5,000. On June 1st, in the old Hospital, the house census was 101; on the same date, 1908, in the new Hospital, it was 198, and on February 1, 1909, 210. In the emergency department a like increase has occurred, amounting to over 40 per cent. in eleven months.

Less than a decade and a half elapsed before the Trustees again were faced with the same problems that confronted them previous to the erection of the last hospital building which was completed in 1907, and it was met with the same broad vision, exceeding all previous hospital accomplishments, by planning for a fourteen story hospital annex, it being the tallest hospital in the world.

#### **DEPARTMENT FOR DISEASES OF THE CHEST**

The Department for Diseases of the Chest is at 236-238 Pine Street. This Department contains forty beds for the care of patients suffering with advanced pulmonary tuberculosis. The dispensary offers treatment to ambulatory patients. Applications for admission to the ward service are so numerous that there is a long waiting list.

The work of the department deals largely with the general problem of tuberculosis. The need for a department to do such work must be evident when it is recalled that about one per cent. of the population has active tuberculosis requiring treatment; that approximately one in every ten persons dies from tuberculosis in some form, usually tuberculosis of the lungs.

One of the fundamental measures which authorities agree is necessary, if we are to continue to make headway in the control of the "Great White Plague," is the isolation and segregation of the advanced, indigent, and dangerous consumptive. This segregation is possible in our wards. The second fundamental requisite in the effort to reduce the mortality from tuberculosis, is the early diagnosis and treatment of tuberculosis in the curable stages. The department renders this service available to the community. The third and perhaps most important fundamental measure in the effort to control tuberculosis mortality is prevention. When a patient is found to have tuberculosis the home condition is investigated by trained nurses and workers acting under the direction of the Social Service Department. The members of the family not victims of the disease are given directions to preserve their health. Those exposed to the patient are directed to report to the dispensary for examination to discover incipient cases. When incipient cases are found, sanatorium care is arranged for. Arrested cases are taught how to prevent relapses. The abnormalities of environment which predispose toward disease are corrected.

As a result of the organized warfare against tuberculosis, the number of deaths from the disease in the United States has been reduced one half in the past twenty-three years. In 1900 the mortality rate was approximately 200 per 100,000 population; in 1923, it is estimated that the mortality will probably be less than 100 for the same unit of population. The Jefferson Chest Department plays a prominent part in the local anti-tuberculosis work. Its influence is felt throughout the entire country by reason of

the fact that all the Jefferson students receive their clinical training in tuberculosis in the department.

The following are some of the special subdivisions of the department:

The Clinic for Undernourished Children is conducted by the class method. A group of twenty children, who are under weight for their height and age, are assembled at stated times and examined for the cause of the undernourishment. When this factor is found and removed a gain in weight usually occurs. The undernourished child is potentially tuberculous and in the program of preventing tuberculosis the attention focused on the correction of under-nutrition in childhood will undoubtedly result in a decreasing morbidity and mortality from tuberculosis in years to come.

In the Asthma Clinic, studies are being made on the cause and treatment of this very common disease which until recently has been considered more or less intractable. The work of the clinic has met with success. Much study remains to be done and much work for the future has been planned.

The Negro Clinic is conducted during special hours by a Negro physician and a Negro social worker under the supervision of the Medical Director. Tuberculosis is three times more fatal among negroes than among whites and in the effort to combat the ravages of the disease, the Negro conducted dispensary under the sympathetic direction of the whites has proved a very effective method of attack.

The most recent development of the clinic work has been the special study and treatment of patients with lung abscess. This distressing condition has become more frequent in recent years and its treatment has always been rather unsatisfactory. Under Dr. Jackson's direction Dr. Lukens and Dr. Moore have been working along the lines of which he is a pioneer, and have been endeavoring to treat the lung abscesses by the use of the bronchoscope. The work has been so successful that the department's activities

along this line will be extended as far as the facilities will allow.

The entire work of the department is a charity in its truest meaning and its scope, like that of the general hospital, is limited only by funds available. During the past year 163 patients were cared for in the wards; 9724 patients days' treatment were administered and 6734 dispensary visits were made by out-patients.

Because of the lack of funds the department was compelled to close the wards during the summer months, but with continuance of the dispensary and social service department. During the nine years in which this department has been in operation 2188 patients have been cared for in the wards and 7226 patients in the dispensary.

## **MEDICAL REPORT OF THE MATERNITY DEPARTMENT OF THE JEFFERSON HOSPITAL**

**For the Year Ending May 31st, 1923**

During the past year 351 patients were admitted to the Maternity; 1869 women applied for advice and treatment, and received pre-natal care. In the Out-Patient service, 1099 women applied for medical care and pre-natal advice.

During the past year there were 285 operations performed in the Maternity, of which 39 were major operations. In the wards of the Maternity during the past year occurred among the mothers nine deaths from the various complications of parturition. These patients were critically ill on admission and no fatal illness developed in the Maternity.

The Visiting Nurse of the Maternity visits its patients in their homes, giving pre-natal care and advice and also attending the mother and child after confinement; 2609 calls were made and 200 articles of clothing distributed among the patients by this nurse.

The Maternity is in active co-operation with other institutions, especially with Social Service Department of the

Hospital, the Organized Charity, the Municipal nurses, and those who work among women and children. The disturbed economic conditions have made many additional demands upon its resources. It gratefully acknowledges the receipt of 200 articles of clothing made by the Philadelphia Branch of the Needlework Guild.

At the Dispensary 810 mothers and 158 children visited the Institution; there were 245 deliveries done by the Staff and the nurse in charge of the Dispensary made 2143 visits.

The total number of visits made by the two nurses from the Maternity and the Dispensary were 4752 during the year. When it is remembered that long distances have to be traveled, depending upon trolley service, and that the visit of the nurse includes not only the care of the mother, but bathing and care of the infant as well, the magnitude of this work can be appreciated.

While space and facilities are unfortunately greatly limited, the influence exerted for the public good by the Maternity Department of the Jefferson Hospital and its Dispensary must be recognized as a positive asset of great value in the best interest of the city.

EDWARD P. DAVIS, M. D.  
*Medical Director*

REPORT OF MATERNITY DEPARTMENT OF JEFFERSON HOSPITAL  
 May 31st, 1922 to May 31st, 1923.

Patients admitted to house .....	351

## **THE JEFFERSON MATERNITY TRAINED NURSERY-MAIDS FOUNDED 1895**

These maids are graduates of a course of four months' training in the Maternity Department. They are admitted to the course only after a careful examination of their characters, dispositions and physical conditions, and must be not less than eighteen years old.

Their training covers the care of infants of all ages, including older children, and requires neatness, absolute cleanliness and obedience—qualities essential in nursery-maids of a higher order.

### **DUTIES OF A NURSERY-MAID**

After a nursery-maid has completed her course of training and has been found thoroughly satisfactory in every respect, and fully competent to take charge of a baby or an older child, she is recommended for a position, on the understanding that she will faithfully perform all her duties and conform to the following regulations:

Among her duties will be: The preparation of the baby's food in accordance with written directions from the attending physician, parent or some other responsible person; the care of the child; the care of the bottles; the washing of the baby's flannels and diapers.

She must wear her uniform, consisting of a wash dress, cap, collar, and apron with strings, bib and straps. The color and material of her dress may be that of a Jefferson trained nursery-maid (blue-checked gingham) or white, at the discretion of her future mistress. The uniform is adopted in order to dignify the position, and to show that the maid has completed a course of recognized training.

Absolute neatness and cleanliness of person is required. She must understand plain sewing and mending.

The nursery-maid shall not leave a place without giving two weeks' notice and can require the same for herself from her mistress.

The nursery-maid, although receiving her training at an authorized training school for nursey-maids, must not forget that she is a maid, though of high class, and must conform to the customs and rules for the maids in the household in which she may be placed, such as eating in the kitchen, taking her day out, etc.

The wages of the nursery-maid shall be thirty-five dollars (\$35.00) a month, for the first year after leaving the Maternity.

Applications for nursery-maids should be made to Miss Martin, Head Nurse of the Maternity Department of the Jefferson Hospital, 224-226 South Seventh Street. If the maid proves satisfactory, a fee of not less than five dollars (\$5.00) is, at the end of one month, payable to the Chairman of the Committee. This fee is for the benefit of the Maternity Department. No fee is charged the nursery-maids.

During the year 1922 there were 65 applicants for nursery-maids and four position were filled. Twelve young women applied for training; of these seven entered training and two diplomas were given. Two older graduates returned for new positions.

It is the custom of the Committee to give diplomas only to nursery-maids who prove their fitness by one year's successful work in private families after leaving the Institution. There is great need for those willing to receive training for this work.

Disturbed industrial conditions have made it almost impossible to obtain young women to train for nursery-maids. High wages in all departments of business are more attractive than the comparatively small wages which nursery-maids receive during training and sometimes after graduation.

When conditions were worse we could obtain no one to train for this position, but recently desirable applicants have appeared and it is hoped that the work will soon go on as formerly it did. There are frequent applications for them and many times their number could receive good situations if they were available.

HELEN A. AHERN

Year ending May 31st. 1923

"Both as individuals and as workers for the good of the whole, there is nothing more vitally concerns us than the question of individual health."

With a comprehensive understanding of this fact, the members of the Staff have without reserve given themselves in intelligent effort, with the end in view, that there might be secured the "maximum attainable health" for each one who has become our responsibility, thus serving the individual, the Hospital and the Community.

4243 patients were referred to the Department, an increase over last year of 1520.

10,187 visits were made, an increase over last year of 3574.

The keynote for the year has been prevention. No where has this been more clearly demonstrated than in the Pediatric Clinic, which embraces the Children's Cardiac,

and the Tuberculosis Dispensaries. Here the worker has been in close touch with The Children's Aid Society—The Association for the Prevention and Relief of Heart Disease and The Health Council of Philadelphia. The greatest effort has been expended on early and potential cases of heart disease and tuberculosis, though none were neglected, and every known technique has been employed in solving any problem found, or in adjusting any condition that interfered with constructive results. Children suffering from malnutrition have been especially noted. The worker with this particular group attended lectures on nutrition—so that she might have the latest information on this ever changing and all important subject. Dr. Ralph M. Tyson, because of his recognition of the importance of this matter, has given a fund to be used by the Social Service Worker in providing milk for many of these undernourished children. We wish to thank Dr. Tyson for this privilege.

The Surgical Workers have proven themselves technicians trained in the means of social adjustments. "Just beyond the lowest step of the Orthopedic, Gynecologic and General Surgical Dispensary door lies a chasm." The patients do not know how to cross it! The social workers make an effort to bridge it for them. Accordingly crutches, casts, braces, glasses, and all other prescribed surgical appliances have been supplied this year, some free—others part payment—and still others on a loan basis. The contact thus made enabled the workers to discover conditions which had a direct influence on the immediate handicap and to elicit facts concerning these conditions which had prevailed even prior to the onset and which, in many cases, had precipitated the present situation. Taking this knowledge as a basis and working in close consultation with the physicians much has been accomplished in re-construction.

The work of the Chest Department continues to grow. When a diagnosis of active or incipient Tuberculosis is made it means a decided change in the patient's mode of living. Whether he goes to a Sanatorium or whether he stays at home, he must be instructed as to how he can best

take care of himself—protect his family and the Community. Then there is the problem of the contact and suspect class. Here again preventive work has been the outstanding feature. The Colored Clinic with its doctors and nurses provided by the Health Council of Philadelphia, is an important and far reaching phase of this Department and presents its own characteristic problems. A full time secretary has been added to meet the increased demand in this Department.

Space will not permit us to tell of the rigid follow-up system in the Medical, Dermatological and Genito-Urinary clinics, nor of the patient, intelligent solving of the problems presented by the Neurological Department.

Volunteer Motor Service has been established this year. It has been efficiently taken care of by the Misses Lee, Hooper and Overend. This particular service has proven itself to be invaluable to us and we have great expectations for its continued and increased usefulness.

Ivycroft Farm is an important adjuster of the Social Service Department and not only of this but of many other Health and Social Agencies of the City. There has been this year an increased demand for convalescent care for men and many times the house could not accommodate the applicants. A waiting list was the result. The comparatively new shop, has been invaluable in assisting the men to regain their health and morale. It has proven its need and worth. Here an Occupational Therapist has given instructive and constructive employment to the brain and hand, giving the man the assurance that he can do something worth while, even though his erstwhile employment is no longer suited to him. This is especially true of cardiac cases, of which we have had many.

“The personality that has strength and healing in its touch makes not only the great physician—but the successful social worker as well.” With such personality we wish to continue our work always extending its scope of usefulness, always with a greater desire for larger results.

MRS. GEORGE J. SNOWDEN,  
MRS. HOLLISTER STURGIS,

The work of the Social Service Department is reported fully in another place, this report need not go into those phases of the work but will outline a few of the activities of the Committee.

Ivycroft Farm, our Convalescent Home for Men, has continued its beneficial work. Sixteen hospitals and nine outside agencies have sent patients, of these over one-third were cardiacs. Convalescent homes, as a rule, do not receive cardiacs but Ivycroft has always admitted these cases and many of them have been discharged greatly benefitted and strengthened.

The celebration of Thanksgiving, Christmas and Easter at Ivycroft was as usual arranged for most generously by the Committee and all the holidays were times of cheer and good fellowship.

The Clothes Closet Committee gave out during the year over two hundred articles. Underclothing, dressing gowns and night clothes were distributed through the Chest Department to patients leaving for sanatoria, and little Alice and Benny outfitted on leaving the hospital. The problem of placing in homes these children who had been in the hospital from babyhood was solved by the Department with the co-operation of the Committee, and the interest in them aroused new enthusiasm for the work.

The Committee on the Department for Diseases of the Throat and Chest did valuable service in many ways. One of the most delightful, in its results, was the re-decorating of the garden which had rather fallen into disuse. Flowers, fresh paint and good taste made this a source of pleasure to both patients and workers.

The Library Committee has gone on with its work of bringing diversion and cheer into the wards. There are now about one thousand books available at all times, as well as magazines of varied types in large numbers. Should a patient particularly desire a book which is not in the hospital library it is obtained from the public library or purchased by the Committee. The children rejoice in Louisa

Alcott, Horatio Alger and Henty. Older patients of all shades of literary taste have been provided with reading matter that has served to lift their spirits above their physical discomforts. Those in a position to note it have testified that the entire atmosphere of the wards has been changed for the better since the advent of the library service.

A new line of work was opened up by the Volunteer Motor Messenger Service. A car, driven by one of these volunteers, was at the disposal of the department two days in the week, with an emergency list of volunteers for other days. Patients were brought to clinics, others were taken to their homes or to railroad stations and much effective service was rendered.

The Committee greatly regrets the loss of Miss Alice Campbell as occupational therapist but rejoices that the vacancy caused by her departure for China was filled by her sister, Miss Helen Campbell.

MRS. JOHN M. FISHER,	MISS JEANNE DE ROUSSE.

The Nurses Commencement was held for the last time in the old Clinical Amphitheatre on May 18, 1922. The address was made by Dr. J. Torrance Rugh and forty nurses graduated. A dance followed the exercises and refreshments were served.

On June 15, 1922, the Samuel Gustine Thompson Annex to the Jefferson Hospital was started on the site of the Nurses' Home. The pupil nurses were moved to the Irving Hotel on Walnut Street. During the summer the pupil

nurses were moved into the four Spruce Street houses, 1012-1014-1016 and 1018 Spruce Street; the graduate nurses occupying the house at 1029 Walnut Street.

The nurses have been pleased with their new quarters. Hammocks were placed in the open air in the rear of the houses on Spruce Street, and the yards made comfortable and attractive for the nurses; also a sum of money was set aside to provide ice cream and cake during the warm weather.

A door was cut through between 1012 and 1014 Spruce Street and a connecting passageway built between 1016 and 1018 Spruce Street. This is a great protection during bad weather as the nurses are able to go from one house to another under cover. It has also been found a help to Miss McCleavy in making her rounds.

Six bureaus, 2 dozen towel racks and an electric heater were purchased, also a victrola for the Walnut Street Nurses' Home, for which records were kindly donated.

At Christmas money was raised by Mrs. William E. Goodman, Jr., to buy two hundred silk umbrellas for the pupil nurses.

A large Christmas Tree was provided for the Spruce Street Nurses' Home; and one at the Department for Diseases of the Chest, at 236-238 Pine Street. Both places were decorated with wreaths and greens.

Room 615 in the Hospital has been set aside for pupil nurses who are ill. The Committee visit and bring flowers and books to these nurses.

At Easter plants were sent to the Nurses' Home on Spruce Street, and the Maternity and Chest Departments.

Respectfully submitted,

MARION H. BUTTON,

*Secretary.*

SECTION OF CHILDREN'S WARD

## COMMITTEE ON THE CHILDREN'S WARD

MRS. SIMON GRATZ, *Chairman.*

MRS. ROBERT E. HARE,  
MRS. ROLLIN H. WILBUR,  
MRS. EDWIN E. GRAHAM,  
MISS ANNA J. MAGEE,  
MRS. P. BROOKE BLAND,

MRS. WILLIAM H. LLOYD,  
MRS. OWEN J. ROBERTS,  
MRS. F. LESLIE MULFORD,  
MRS. WILLIAM F. MOORE,  
MRS. THOMAS STELLWAGEN,

Nothing which could add to the comfort or convenience of our little sufferers has been lacking. We try to fill each need as soon as it is known, often by a gift from some member of the Committee. The "Wenola Club," made up of the women employees of the Philadelphia Electric Company, keep their warm interest in the children and do an enormous amount of good work, giving many dozens of garments and many outings to those children who are able to be taken from the Ward.

Christmas was, as usual, a beautiful one, and such numbers of outside friends remembered the little shut-in sufferers that we had quite an overflow of toys which were turned over to the Social Service Department for the Dispensary Children. We also gave to them fifty pounds of candy, a box of apples and a box of oranges.

The Committee has furnished all clothing worn in the ward, and in the Throat and Nose Department on the 3rd floor.

We are finding it increasingly difficult in these days of high prices to make the money given us by the Hospital Committee cover the expense for so much clothing. The amount given us is most generous considering what the Hospital Committee has to dispense. This money is used for clothing. Other needs of the Ward are met by gifts from members of our Committee.

We regret beyond expression the death of Mrs. Daniel Baugh who has served on this special Committee since its formation. She was known and loved by each one of us and her heart and purse were always at our command.

## SUB-COMMITTEE ON PRIVATE ROOMS

MRS. ROLLIN H. WILBUR *Chairman*

The Committee on Private Rooms is often gratified at the kind comments made on the appearance and comfort of the rooms. New paint has added freshness to many of them, and every effort has been made to keep them scrupulously clean.

The trays are as prettily appointed as ever and on holidays appropriately and daintily decorated to suit the occasion, by the cleverness of the dietitians. The menus are carefully chosen and are most liberal.

Seven dozen damask water tray covers were given by Mrs. Wilbur.

The couch-covers are still a matter of the Committee's consideration, several new types not giving satisfaction.

The Committee is always trying for new ideas to make the rooms more attractive. Suggestions are welcome.

The halls were decorated with holly and greens at Christmas and with flowers at Easter.

## REPORT OF SUB-COMMITTEE ON WARDS OF THE DEPARTMENT FOR DISEASES OF THE CHEST

Since the first of May, 1922, the wards have been visited frequently by the committee, and literature, including magazines, books and the pictorial sections of the newspapers distributed. The wards being closed for the summer, activities were discontinued, but were resumed the beginning of October. The chairmen have supplied utility bags, eider-down bed-socks and caps and warm flannel shirts, some of which were made by other members of the Women's Board. These added greatly to the comfort of the patients.

Donations from Mr. H. A. Prizer and Mr. Charles J. Eisenlohr helped Mrs. Davis to provide 25 Thanksgiving baskets which were given to very deserving families.

Christmas brought cheer and happiness. A personal visit from the chairmen seemed a real help, and from every one there was a smile and "A Merry Christmas" even from those critically ill. Trees beautifully trimmed were placed in each ward, and wreaths were placed at each window. A donation of very beautiful toys was given by Mrs. Hughes. The men in the convalescent ward decorated their walls very attractively, and deserve credit for the clever way in which it was done. A pretty but practical pencil with tablet and envelopes tied with appropriate ribbon was given to each patient. Breakfast trays with crepe paper napkin, a clear candy toy and holiday card was served to each one. A victrola was presented by Judge Davis and has contributed much to their pleasure and entertainment.

One hundred baskets well stocked with provisions were given by a friend, and were gladly received by families of ward patients. It was a joy to witness their pleasure and gratitude.

Through the months until Easter, the same personal interest prevailed. The patients were generously remembered at this time. Beautiful plants were placed in each ward, also in the nurses' library. Breakfast and supper trays were arranged and served in the same way as at Christmas. Grape fruit, oranges and 12 dozen fresh eggs were added to these other gifts. Seventy-five fancy paper eggs filled with chocolates were given to the children.

Early in May, the garden was put in a good condition. The convalescents took an active part and helped to prepare it for the flowers which consisted of pink geraniums, rambler roses and vines. The walls were whitewashed, fence painted blue, also the chairs and canvas renewed. It has been of great benefit and thoroughly enjoyed.

On June 15th, an ice cream and cake party was given to 125 children, and much credit is due those who so kindly tendered their services and made it a success. Not only the

patients, but the staff express a sincere appreciation for all that has been done. The chairmen wish especially to thank Mrs. Walter Lee for her efficient assistance in all their undertakings.

Respectfully Submitted,

MRS. J. RUTHERFORD McALLISTER,  
MRS. ROBERT J. HUGHES,  
MRS. HOWARD A. DAVIS,

*Chairmen.*

#### **SUB-COMMITTEE ON PRIVATE ROOF GARDEN**

MRS. EDWARD A. SCHMIDT, *Chairman.*

Although to-day (June 18th) was a record day for heat, the roof at the Jefferson Hospital was most comfortable, and a number of patients and a few nurses seemed to be enjoying the refreshing breezes.

There have been no changes made this year—the wicker furniture still looks good—and also the awnings. The chair cushions, however, have not been put out this summer as they require new coverings. Owing to the building operations, the dust, etc., and considering the new roof garden which we will have next year to furnish, it seemed most practical therefore, not to purchase new expensive materials this year, which even at the high cost, are so poor in quality and dye, and most unsatisfactory to weather, sun and rain, and the dust. Especially when next year we hope to make a vigorous effort to beautify the new roof garden promised.

#### **SUB-COMMITTEE ON PURCHASING**

MRS. O. J. DEROUSSE, *Chairman.*

During the past year this Committee has purchased the supplies for the Women's Auxiliary. Evergreens were provided for the Hospital steps. At Christmas, greens and trees for the wards were provided, as well as plants at Easter.

The following garments were purchased for ward patients: Two dozen heavy bath robes and two dozen caps of heavy material, for use of clinic patients. Six dozeningham bed wrappers.

## ANNUAL REPORT OF THE TREASURER OF THE WOMEN'S BOARD

May 31, 1922 to May 31, 1923.

### RECEIPTS

Balance in bank May 20, 1922.....	\$651.39
Received from dues and fines.....	422.25
Received from contributions.....	35.00
Horse Show Returns.....	830.00
Christmas bowl.....	24.43

<hr/>	
Total Receipts .....	\$1,978.47

### EXPENDITURES

Merchandise for public wards and roof garden ...	\$728.69
"        " private rooms.....	107.91
"        " Children's ward.....	321.86
Flowers.....	260.00
Nursery.....	25.00
Printing and postage.....	53.67
Christmas.....	171.63
<hr/>	
Total Expenditures.....	\$1,668.76
Balance in bank May 20, 1923.....	\$ 309.71

Respectfully submitted,  
GERTRUDE C. EVANS,  
*Treasurer.*

## THE TRAINING SCHOOL FOR NURSES

The Training School for Nurses has been in successful operation for thirty-one years; at no time in its history has the school been more prosperous. The entire organization is under the direction of the Hospital Committee, to which through the Medical Director, all matters of discipline and curriculum are brought for final consideration. Recogniz-

ing that proper teaching of the science and art of nursing can be best accomplished under the supervision of medical men, it has been provided that the course of study be formulated and directed by the Hospital Staff. For this purpose there is appointed annually a Committee of the Staff, known as the Training School Committee, consisting of six members, who outline the curriculum and designate the teachers of the separate branches.

The Directress of the Training School is the executive having immediate charge of the work done by the pupils; she supervises the practical instruction in wards, operating rooms, diet kitchen and in classes, for which purpose she is supplied adequate assistance. The Nurses' Home is under her immediate supervision, as is also the home life of the pupils in training, and all her subordinates.

#### **COURSES OF STUDY**

The course of study is three years, during which time the Directress of the Training School assigns each pupil, for definite periods, to the various wards and services. Such practical training under skilled supervisors best applies the science and most adequately teaches the art. The course of study is modified and improved year by year, always with the idea of betterment. Like all other professional schools, changes are necessary for improvement, to stand still is retrogression. Each year new subjects are introduced or old ones taught in new and, it is believed, better ways. The curriculum embraces a probation term\* of three months, a junior term of nine months, an intermediate term of twelve months, and a senior term of twelve months. Practical work is given each nurse in the following:\*\*

---

\*Candidates during their probationary period will be accepted or rejected as pupils of the Training School according to their qualifications as determined by the Directress of Nurses.

\*\*Subject to change without notice. The management at all times reserves the right to make such changes as may seem wise without notice, to, or consent of, the pupil.

Men's and Women's Medical Wards .....	7 Months
Men's and Women's Surgical Wards .....	7 "
Children's Ward .....	4 "
Roof-garden and special details .....	1 "
Private Corridors .....	4 "
Accident Ward and Dispensaries .....	2 "
Operating Rooms .....	3 "
Maternity Department .....	3 "
Department for Diseases of the Chest .....	3 "
Diet Kitchen .....	2 "
Approximately six months of night duty are	
given in two or more terms, rarely exceeding	
three months each, distributed in the above	
services.	

## FIRST YEAR

### INTRODUCTORY LECTURE

#### Preliminary Course, 1 Month

THE MEDICAL DIRECTOR. The Duties, Obligations and Responsibilities of the Trained Nurse.

### BACTERIOLOGY AND HYGIENE

PROF. R. C. ROSENBERGER. Seventeen Lectures. General distribution of Bacteria, how bacteria produces diseases. Epidemics of Diseases due to dissemination by Contact, Water, Milk, Carriers, Insects. Methods of obtaining Antitoxin and other sera, role of Vaccines. Disinfection by steam, hot air and chemicals. Dangers of dusts in various occupations.

### NURSING IN TUBERCULOSIS

#### Three Classes

ELMER H. FUNK, M.D. Tuberculosis—Frequency of infection and mortality, predisposing factors, methods of spread of the disease. The Social problem and the Nurse's position in the anti-tuberculosis crusade. The manifestations of the disease—the special knowledge which a nurse should have successfully to attend tuberculous patients. The temperature, pulse, etc. The care of patient—rest—fresh air—properly prepared diet. The principles underlying and methods of application of these measures. Prophylaxis. Methods of disposals of sputum, excreta and of disinfection of articles in contact with patient. Nursing in emergencies such as Pulmonary Hemorrhage, etc. The preparation for paracentesis of the Chest.

## **ORTHOPEDIC SURGERY**

**PROF. J. TORRANCE RUGH.** Care of Feet and Correct Walking.  
Orthopedic Nursing.

## **PRACTICAL NURSING**

**Sixty Classes**

## **DIETETICS**

**Twelve Demonstrations. Twenty-four Classes in Theory.**

Responsibility of the nurse in ordering, preparing and serving nourishments and regular diets. Measuring, combining ingredients. Preparation of eggs, of beverages, of nourishments. General rules for diet kitchen work. Care of diet kitchen equipment. Care of trays, linen, china, glass and silver ware. Setting and serving trays. Food. Composition, classification and caloric value. Protein, fat, carbohydrate, mineral matter, water. Methods employed in cooking food. Meat—Demonstration of different cuts. Menus for patients on regular and special diets, including color schemes. Metabolic diets.

## **MASSAGE**

**MARY G. CORBIN.** Twenty demonstrations.

## **RECITATIONS**

Recitations and demonstrations, including practical bedside work, are given by the Directress and her assistants.

## **SECOND YEAR**

### **GYNECOLOGY**

**PROF. BROOKE M. ANSPACH, M.D.** Consequences and Sequelæ following Abdominal Operation.

**JOHN M. FISHER, M.D.** Two Lectures. Abdominal Operations.

**P. BROOKE BLAND, M.D.** Medical Gynecological Nursing. Nursing in Vaginal Operations.

**ALFRED HEINEBERG, M.D.** Two Lectures. Anatomy of Pelvic Organs.

### **DISEASES OF THE EYE**

**PROF. WILLIAM M. SWEET, M.D.** Anatomy of the Eye. Nursing in Diseases of the Eye.

SOLARIUM

## **DISEASES OF CHILDREN**

PROF. E. E. GRAHAM, M.D. Feeding of Infants and Children.  
JULIUS BLECHSCHMIDT, M.D. Nursing in Gastro-Intestinal Diseases.  
RALPH ENGLE, M.D. Nursing in Respiratory Diseases.  
W. H. JOHNSTON, M.D. Nursing in Nervous Diseases.  
NORMAN M. MACNEILL, M.D. Nursing in Acute Infectious Diseases.  
RALPH M. TYSON, M.D. Hygiene of Nursery, Clothing of Infants.  
Etc.

## **SURGERY**

DUNCAN L. DESPARD, M.D., Fractures, Dislocations, Sprains, Anesthesia, Splints.

## **SURGICAL NURSING**

Eighteen Demonstrations. Preparation of patient for Operation. Preparation of patient for Anesthesia. Instruments (Metal, Rubber, Silk, Glass, Illuminated), Preparation, Sterilization, Use and Care. Sterilizers and how to use them. Preparation of Special Binder, Bandages, Plaster Dressing, etc. Padding of Splints.

## **BANDAGING**

LOUIS CHODOFF, M.D. Twelve Demonstrations.

## **ANATOMY AND PHYSIOLOGY**

J. M. FLICK, M.D. Twenty-five Lectures. Anatomy and Physiology of the Human Body.

## **MATERIA MEDICA**

LEIGHTON APPLEMAN, M.D. Drugs: Their Proper Names, Sources and Active Principles. Pharmaceutical Preparation of Drugs with their Definition and General Uses. Dosage and Methods of Administering Drugs. Physiological Actions of Drugs. Poisons: The Treatment of Poisoning. Counter Irritation. Hydrotherapy. Antitoxins: their Uses. Vaccines and their Applications. Review. Materia Medica. Twelve Classes.

## **RECITATIONS**

Recitations and demonstrations, including practical bedside work, are given by the Directress and her assistants.

## **THIRD YEAR**

### **SURGICAL NURSING**

PROF. J. CHALMERS DAcOSTA, M.D. Two Lectures. Instruments and their uses.

WARREN B. DAVIS, M.D. Five Lectures. Hemorrhage, Wounds and Burns. Shock, Treatment of Shock. Bites of Dogs, Insects and Snakes. Drowning, Asphyxia. First Aid to the Injured.

### **SURGICAL AND OPERATING ROOM TECHNIC**

B. L. FLEMING, M.D. Fifteen Classes.

### **OBSTETRIC NURSING**

PROF. EDWARD P. DAVIS, M.D. Obstetric Nursing in Private Houses; Complications of Pregnancy, Abortion, Eclampsia, Hemorrhage. Signs and Symptoms of Labor; Preparation of the Patient and her Room; the duties of the Nurse during Spontaneous Labor.

GEORGE A. ULRICH, M.D. Obstetrics, Antisepsis and Asepsis; Signs, Symptoms and Treatment of Post-Partum Hemorrhage. Duties of the Nurse during Obstetric Operations; the Sterilization of Instruments, Dressings, Field of Operation, Operating Tables, the Posture of the Patient, the Anesthetic; Shock and Hemorrhage. The Normal Puerperal State. Complications arising during the puerperal State for Mother and Child. The infant, its Food and Dress. Bathing, Exercise, Development and Weaning.

### **OBSTETRIC NURSING**

Five Classes—Conducted by the Head Nurse of the Maternity Department.

### **NURSING IN GENITO-URINARY DISEASES**

PROF. HIRAM R. LOUX, M.D. Nursing in Venereal Diseases; Methods to be adopted in Order to Prevent Contagion. Urethral Instruments, Care, Sterilization and Uses. Retention of Urine; Causes, Symptoms and Treatment. Uremia; Causes, Symptoms and Treatment. Hematuria; Causes, Treatment. Catheterization.

### **LABORATORY**

B. L. CRAWFORD, M.D. Normal Urine. Deviation from the normal to be noted by the Nurse. Proper Method for collecting samples for Examination. Simple Emergency tests.

## MEDICINE

FREDERICK J. KALTEYER, M.D. Seven Lectures, fever.

ROSS V. PATTERSON, M.D. Cardiac and Pulmonary Diseases.

## MEDICAL NURSING

Sixteen Classes—Conducted by the Directress of the Training School.

### DISEASES OF THE THROAT

PROF. CHEVALIER JACKSON, M.D. Surgical Proceedings involving Larynx, Nursing care of Tracheotomy cases, etc.

F. O. LEWIS, M.D. Care of accident cases and surgical proceedings involving Nose and Throat.

### DISEASES OF THE EAR

PROF. S. MACCUEN SMITH, M.D. Anatomy of the Ear.

J. CLARENCE KEELER, M.D. Quiz on Otology.

A. SPENCER KAUFMAN, M.D. Diseases of Middle Ear and Mastoid arising from acute infective diseases.

### DISEASES OF THE SKIN

PROF. FRANK C. KNOWLES, M.D. Anatomy of the Skin. Suggestions on the care of Diseases of the Skin.

### DISEASES OF THE NERVOUS SYSTEM

S. F. GILPIN, M.D. Nursing in Organic Nervous Diseases. Nursing in Insanity. Nursing in Functional Nervous Diseases.

### DISEASES OF JOINTS AND APPLICATION OF PLASTER BANDAGES

ARTHUR J. DAVIDSON, M.D., Two Lectures.

Frequent recitations and demonstrations, including practical bedside work, are given by the Directress and her assistants.

During the year just ended 40 nurses completed the course, graduating at Commencement held on May 17th. The number of graduates is now 625.

During the year 677 inquiries were received and 169 applications were filed. The school census follows:

Pupil nurses and probationers, May 31, 1922.....	145
Graduated .....	43
Resigned and rejected .....	28
Admitted .....	74
Pupil nurses and probationers, May 31, 1922.....	148

## NURSES' HOME

The Nurses' Home, in addition to the dormitories, provides recitation, recreation, reading and reception rooms. Under proper regulations, nurses are permitted to see and entertain their friends, enjoy social evenings, and every effort is made to secure something of home life and the pleasures of congenial companionship. A Committee of the Women's Board regularly visits the Home, provides comfort, and looks after the general welfare of the pupils. The social features of last commencement were entirely under the direction of the Nurses' Home Committee of the Women's Board, to whom all were indebted for a most enjoyable occasion.

A Register of the Graduates of the Nurses' Training School is kept in the office of the Directress, and nurses are supplied on application by telephone, mail or in person. Alumnae are requested to keep the Directress informed as to their addresses, and whether engaged in or desiring private or institution nursing or administrative work.

Applicants for admission to the Training School should call upon or address the Directress of the Training School for Nurses, Jefferson Hospital.

## YEARLY COMPARISONS

Year	No. of Patients Admitted to Hospital	Patient Days Treatments	Cost per Diem Provisions All Persons Supported	Cost per Diem Ward Patients

## **GIFTS BY WILL**

In the State of Pennsylvania, testamentary provision for a charitable institution must be by a will made at least thirty days prior to the decease of the testator. The signature of the testator must be attested by at least two subscribing witnesses, who should sign their names as witnesses thereto in the presence of the testator and of each other.

None of these witnesses should be interested in any manner in the institution intended to be benefited, as manager, trustee, officer, employee, beneficiary or otherwise.

The testator may either bequeath personal property or devise real state to the institution generally or may create an endowment whereby only the income therefrom shall be used for its benefit.

The following forms are suggest for a legacy of personal property and devise of real estate where it is intended that the same shall be devoted to the use of the Hospital generally without restriction.

### **FORM OF BEQUEST OF PERSONAL ESTATE**

I give and bequeath unto THE JEFFERSON MEDICAL COLLEGE, of Philadelphia, for the maintenance, extension or betterment of its Hospital Department, the sum of..... dollars.

### **FORM OF DEVISE OF REAL ESTATE**

I give and devise unto THE JEFFERSON MEDICAL COLLEGE, of Philadelphia, its successors and assigns, for the maintenance, extension or betterment of its Hospital Department (here describe the property).

If the testator shall desire to limit the use of the legacy or devise to a particular purpose, the following forms are suggested. Such purpose can be indicated by suitable designation to be added after the words "Hospital Department."

## **FORM OF BEQUEST OF PERSONAL PROPERTY**

I give and bequeath unto THE JEFFERSON MEDICAL COLLEGE, of Philadelphia, for the benefit of its Hospital Department (here indicate the purpose) the sum of.....dollars.

## **FORM OF DEVISE OF REAL ESTATE**

I give and devise unto THE JEFFERSON MEDICAL COLLEGE, of Philadelphia, its successors and assigns, for the benefit of its Hospital Department (here indicate the purpose) (here describe the property).

If the testator shall desire that the legacy or devise shall create or form part of an endowment for a general or a special purpose, and only the income thereof be used for the benefit of the Hospital, the following forms may be found helpful. The purpose desired can be added after the words "for the endowment of."

## **FORM OF BEQUEST OF PERSONAL PROPERTY**

I give and bequeath unto THE JEFFERSON MEDICAL COLLEGE, of Philadelphia, the sum of.....dollars for the endowment of

## **FORM OF DEVISE OF REAL ESTATE**

I give and devise unto THE JEFFERSON MEDICAL COLLEGE, of Philadelphia, its successors and assigns (here describe the property) for the endowment of.....

**The purposes for which endowments are desired are set forth on page, 20.**
